

Technical Datasheet

C07 SLATE DRY VALLEY

Product Details

The Slate Valley Trim is specifically used for a dry roof valley application. Due to the high volume of water travelling down the valley a patented water drip and multiple outlet system runs along the trim.

Slate Valley Trim permanently secures slates on valleys, eliminating the problems traditionally encountered with small slates pieces falling out.

The components are manufactured from high grade pre-primed polyester coated aluminium.

Product Features

- Provides full wind uplift and rain protection.
- Patented 'Drip System' which allows for self drainage of rain water into the gutter.
- Extremely easy and quick to install.
- Requires no maintenance once installed.
- Can be fully customised.
- Extensive range of colours available.

Dimensions

C07 Slate Dry Valley - Aluminium

Overall length: 3050mm

- Natural Slate
- Standard Slate
