

Evergreen

MULTI-FUEL STOVES

“warmth and efficiency to your home”

Evergreen multi-fuel stoves are the efficient and environmentally friendly way to heat your home. These sturdy cast iron stoves are not only built with endurance in mind but have also been updated with larger windows and a secondary airwash ensuring they exceed the expectations of the modern home owner. One of the most popular stove brands across the UK and Ireland, all Evergreens are multi-fuel, allowing you to burn wood, coal or anthracite. A wide range of models and sizes are available from the compact 5kW Aspen to the beautifully traditional 7kW Dorchester.

All stoves are CE approved and come with a 1 year body warranty (excludes consumable parts).

Range at a glance

	Nominal Output	Output Range	Fuel Type	Efficiency
The Aspen	5kW	5-6.5kW	Multi-fuel	78.90%

Outside air	No / Yes (outside air model)
Made of	Cast Iron

THE POPLAR (Outside Air) ST-406GY

EN 13240

Body Warranty

Secondary Airwash
for a cleaner burn

The Poplar (Plain Door) is also available in a version with 'outside air'. Instead of taking air from the room an inlet is provided allowing the stove to be 'feed' directly from air outside the house and thus avoiding the need for an open vent in well-sealed houses. (This is a factory fitted inlet, and cannot be retro-fitted in one of the non-'outside air' stoves. The appearance is slightly different due to the lack of air vents on the door of the stove).

THE POPLAR (Arch Door) ST-0406G
