## GENERAL GUIDE TO CONSTRUCTING A DECK.

1. Prepare the site.
2. Make the framework using floor joist.
3. Fix treated decking boards onto framework using galvanised screws or nails.
4. If desired add spindles and handrails.
5. Finish project using Woodstain and Wood Preservative.  
See pages 12 and 13 for our range.

# TRADEMARKS AND MEASUREMENT GUIDES

Forest Stewardship Council facilitates the development of standards, ensures monitoring of certified operations and protects the FSC trademark so consumers can choose products that come from well managed forests.

The Programme for the Endorsement of Forest Certification (PEFC) is the world's largest forest certification system. Our credible standards seek to transform the way forests are managed globally – and locally - to ensure that all of us can enjoy the environmental, social and economic benefits that forests offer.

The DeckMark® Certification Scheme is a third party product quality certification scheme operated by the Timber Decking Association (TDA). The scheme is based on recognised quality assurance standards (ISO 9000) and confirms compliance to good manufacturing practices and relevant British Standards and ensures that any Metsä Wood decking product is of the highest standard.

Responsible Purchasing Network (RPN) is an international network of buyers dedicated to socially responsible and environmentally sustainable purchasing. Our membership program and consulting services provide institutional purchasers with cutting edge procurement tools and resources designed to save money, conserve resources, reduce waste, and improve efficiency.
